

Patient Responsibility - **IF THIS IS A MEDICAL EMERGENCY, PLEASE CALL 911.** It is your choice to receive a telemedicine consultation. For safe and effective care, you must truthfully answer questions, provide us with up-to-date medical history, comply with medical advice, and review the treatment notes available in your Personal Health Record in your member portal. You must also act to protect your privacy by preventing others from hearing the consultation, and by safeguarding your username and password.

You understand that healthcare information is gathered from Electronic Medical Records through a health information exchange (Health Gorilla) and aggregated and shared with Revive providers and with your current healthcare providers to access your most recent medical and Rx history for proper assessment, treatment, and diagnosis. ReviveHealth is here to support care for all our patients and all their healthcare providers.

By using this service, you acknowledge your review and acceptance of the SwiftMD (a ReviveHealth company) Terms of Use and Privacy Policy and Consent to Telemedicine Services posted online at revive.health. If you do not accept and agree to be bound by any of these Terms of Use and the Consent to Telemedicine Services agreements, you are not authorized to use this service.

I consent to treatment by SwiftMD (a ReviveHealth company) and agree to the SwiftMD Terms of Use and Consent to Telemedicine Services.

Minor Patients:

If you are initiating this visit on behalf of a minor child, it is your choice to have your minor child ("the patient"), for whom you are a legal guardian, receive a telemedicine consult. You and the patient must truthfully answer questions, provide us with up-to-date medical history, comply with medical advice, and review the treatment notes available in the patient's Personal Health Record in the member portal. You must also act to protect your child's privacy by preventing others from hearing the consultation.

Patients under age 3 cannot be relied upon to adequately describe their symptoms, have more limited reserves and may quickly deteriorate. For these reasons children under age 3 often need to be physically examined by a doctor. If you are willing to accept these risks and understand that a face-to-face meeting with a medical provider is still recommended, then you may use ReviveHealth to speak to a doctor.

By using this service, you acknowledge your review, and accept on behalf of the patient the SwiftMD (a ReviveHealth company) Terms of Use and Telemedicine Informed Consent posted online at revive.health. If you do not accept and agree to be bound by any of these Terms of Use and the Telemedicine Informed Consent on behalf of the patient, you are not authorized to use this service for the patient.

I consent to treatment of my minor child by SwiftMD (a ReviveHealth company) and agree to the SwiftMD Terms of Use and Telemedicine Informed Consent.
